## **Excavation Laborer**

### **Job Description**

Looking for someone who is willing to assist excavation crews in building roads, laying pipes, digging foundations. This is a physically demanding job and is performed in all types of weather. Prior excavation labor experience preferred but not required.

**Qualifications:** Willingness to work hard

#### **Essential functions:**

- Support the work of other skilled craftspeople- equipment operators, pipe layers, etc.- by moving materials, assisting with installation, preparing and cleaning the site.
- Work with his/her hands and with power tools run by gasoline, electricity and compressed air.
- Be knowledgeable of hazards and safety requirements of the job, and use personal protective equipment. ( Work boots, hard hat, etc)
- Work with pavement breakers, pumps, compressors, lasers, vibrators.
- dig trenches and install pipe
- Will support the work of the pipe crew installing new utilities along newly built roads
- use survey or measuring equipment.
- may be required to run lull, loader, or backhoe
- other duties as assigned

#### **Job Competencies:**

- Ability to follow instructions, both verbal and written, but also work without constant supervision.
- ability to communicate and work with all levels of employees.
- Must be able to work in all weather conditions, heat, cold, rain, snow etc.
- Physical demands: lifting, bending, climbing, use of hand tools, and standing for long periods of time.

Job Type: Full-time

Pay: \$13.00 - \$16.00 per hour
